[The Grand Documentation: Ernst Boerschmann and Chinese Religious Architecture \(1906-1931\)](#)

Ernst Boerschmann was the most important foreign architectural researcher in China in the first half of the twentieth century and he served as Professor at TH Berlin between 1924 and 1944. This book concerns his three-year research expedition through the Chinese Empire (1906–1909), long before Chinese academics themselves began to take interest in the subject in the 1930s.
