Discussion questions

In which ways can universities be understood as 'portals of globalization', according to Claudia Baumann? What does such a reading imply for university architecture and urban design?

Which predominant concerns and motives of university design are highlighted in the overview chapters? What could be alternative histories?

2. Presentation task

In groups of 2-4, reflect on what defines university architecture and campus design for you.

Pick one example (your favourite project, or one most relevant / interesting for the course) Are there any transnational aspects to it?

Prepare for a 1-2 minute statement in class with 1-2 slides (1 image, project name, location, plus map /urban layout/satellite view)

Please mail slides by Fri Oct 25, 2pm.
